Participants said...

Thanks for organizing such a great winter school! Since I'm quite new to the field, I feel I benefited greatly from the diverse environment and the engagement with other PhD students.

:-)

Excellent 1st edition; I came back energized from the scientific (and nonscientific) talks. I also enjoyed the time talking with the young scientists during the breaks. This was an excellent event to network with friendly people.

I liked this winter school a lot. The scientific sessions were truly stimulating, capturing my attention even on topics far from my research area. I appreciated the exchange of ideas that took place at any moment of the day. I had the opportunity to meet other researchers who study similar topics to mine. The welcoming environment and everyone's active participation made those 4 days fantastic!

This was a very well-done workshop (hard to believe that it was the first one!) and the ability to talk with the supervisors so easily was incredibly valuable.
